Professional Summary

SnowPro Core Certified Data Engineer specializing in Snowflake architecture, cloud data migration, SQL optimization, and Python automation. Experienced in transforming legacy systems, integrating Java Spring Boot with Snowflake, designing scalable ETL pipelines, and managing end-to-end CI/CD deployments. Strong foundation in predictive analytics, testing automation, and AWS cloud engineering.

Experience

Associate Consultant – Data Engineering

Dec 2024 – Present

Hakkōda (an IBM Company), Jaipur

- Cloud Data Migration: Migrated SQL scripts, stored procedures, UDFs, tables, and views from Redshift/MySQL to Snowflake with 100% data fidelity.
- Led and mentored a team of 8–9 interns to deliver large-scale SQL migration, ensuring accuracy and adherence to cloud best practices.
- Backend Engineering: Modernized Java Spring Boot applications to operate seamlessly on Snowflake-centric architectures.
- Automation Engineering: Designed Python automation frameworks saving 30+ hours weekly and improving delivery efficiency by 40%.
- Built ETL workflows and automated Snowflake data pipelines for scalable data ingestion and processing.
- Predictive Analytics: Developed ML-driven insights to support business decision-making.
- Quality Assurance: Designed testing strategies using JUnit, Mockito, and API testing; achieved 85%+ coverage and reduced production defects by 60%.
- DevOps CI/CD: Managed AWS CodePipeline deployments across dev, QA, and production with zero downtime.
- Built real-time monitoring workflows using AWS CloudWatch to ensure stable and predictable deployments.
- Leveraged AWS services including S3, DynamoDB, CodeBuild, CloudWatch, and Secrets Manager for cloud-native engineering.

Research Experience

IEEE — Scopus Indexed Publication

A Comparative Analysis of Heart Attack Prediction Using Machine Learning Algorithms With and Without Physical Exertion

Conducted ML-based heart attack prediction research; presented at an IEEE conference and published in Scopus-indexed proceedings.

Education

B.Tech in Computer Science (AI Specialization)

SKIT, Jaipur

2021 – 2025

CGPA: 9.74

Class XII (CBSE)

2020 – 2021

Percentage: 96.8%

Class X (CBSE)

2018 – 2019

Percentage: 93.4%

Certifications

- SnowPro Core Certification – Snowflake
- Employee of the Month – August 2025

Technical Skills

Snowflake & Databases: Snowflake architecture, SQL optimization, schema design, MySQL, Amazon Redshift

Cloud Data Engineering: Cloud migrations (MySQL → Snowflake, Redshift → Snowflake), ETL workflows, automated data pipelines

Programming & Automation: Python automation frameworks, reusable modules, Java Spring Boot–Snowflake integration, C++

Cloud Platforms (AWS): DynamoDB, S3, CloudWatch, Secrets Manager, CodeBuild, CodePipeline

Machine Learning & Analytics: Predictive analytics, ML model development, data cleaning, feature engineering

Testing & Quality Engineering: JUnit, Mockito, API testing (85%+ coverage), QA strategy design

DevOps / CI-CD: AWS CodePipeline, zero-downtime deployments, GitHub, Bitbucket

Tools: Sigma, Excel, DBT, Jira, Confluence

Projects

SQL-to-Snowflake Migration Framework

Automated mapping, validation, and transformation for large-volume SQL workloads across cloud environments.

CI/CD Automation Accelerator

Developed Python tooling to streamline deployment processes and reduce manual interventions.

Spring Boot → Snowflake Optimization

Refactored backend logic for Snowflake execution, improving performance and reducing query latency.
